## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 21-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 1 564 039 in view of Patel et al., EP 0 222 614 and EP 0 391 369 in further view of Woodruff et al. (Abstract). and Dappen et al. (U.S. Pat. 5,223,507) for the reasons of record and the further reasons below.

GB 1 564 039, Patel et al., EP 0 222 614 and EP 0 391 369 were discussed in the prior Office Action and the same are incorporated herein.

Woodruff et al. teach that that benzodiazepines, including flurazepam, diazepam, lorazepam, chlordiazepoxide, medazepm, devazepide, L-356260, L-365031, are CCK antagonists (Abstract).

Dappen et al. teaches that gelatin, alginates, cross linked carboxy methyl cellulose and other celluloses, PVP, lactose and other non-toxic compatible substances are suitable excipients for pharmaceutical dosage forms containing opioids (Columns 25-29, Column 30, lines 1-36).

Examiner has duly considered Applicant arguments but deems them unpersuasive.

Applicant argues that GB 1 564 039 does not contain CCK antagonists, however, the prior art teaches that the compounds in GB 1 564 039 are CCK antagonists. Further, one of ordinary skill in the art would expect excipients, such as gelatine, sodium alginate, cross-linked

Art Unit: 1616

carboxymethyl cellulose and other cellulosic substances, PVP and lactose could be used as desired with the expectation they would be effective carriers for the active ingredients.

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.

### *Conclusion*

A facsimile center has been established in Technology Center 1600. The hours of operation are Monday through Friday, 8:45 AM to 4:45 PM. The telecopier numbers for accessing the facsimile machines are (703) 308-4556 or (703) 305-3592.
